Pressure Injury Prevention

Reduces pressure
Prevents injuries
Saves money

Prevention is the key to save lives, time and reducing economic cost.

Injuries caused by pressure can have serious consequences for patients, even putting their lives at risk. Pressure injuries can be painful, difficult and expensive to cure. They can be debilitating, affecting the patient's autonomy and quality of life. Furthermore, pressure injuries can be a major burden to any national health system.

Fresco's range of gel pressure redistribution products are Class I medical devices that relief pressure and friction, helping to prevent injury. They prevent damage to the soft tissues of the body caused by pressure spikes, continuous pressure and / or friction. They can be applied to grade 1 pressure ulcer (meaning closed wounds).

Fresco pressure redistribution pads can be used on its own or fixed with:

- Tubular retention bandage
- Hypoallergenic adhesive for the skin
- Adhesive film

MILLIONS

of people a year suffer from pressure injuries: (USA: +2.5 million, Spain: +90k, UK: +700k)

+\$30BN

is spent each year in the world on pressure ulcers.

x4 or x6

Pressure ulcers increases the mortality risk by 4 times and up to 6 when infected.

20%

of Intense Care Unit patients develop a pressure ulcer.

Source: GNEAUPP, National Library of Medicine, European Wound Management Association (EWMA).

Fresco pads improve people's quality of life

Pressure redistribution
Prevents injuries caused by pressure and friction.

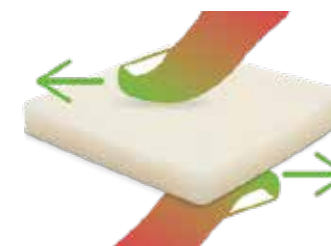

Medical device injuries protection
Prevents injuries caused by the use of medical devices.

Long lasting, washable & reusable
Maintains its consistency overtime. It does not lose its shape.

Low cost
Reusable on the same patient.

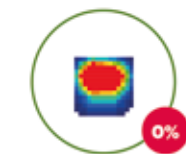

Independent movement
Of top and bottom surfaces for excellent friction reduction and shear protection.

Resilient to bottoming out
Redistributes forces avoiding bottoming out.

Fresco Pressure redistribution pads

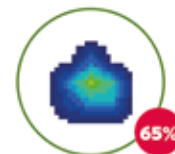

Proven efficacy → Reduces pressure peaks

Without gel pad

With gel pad thickness 0,3cm

With gel pad thickness 1,2cm
