FOOTCARE PRODUCTS

CATALOGUE

www.fresco.es

Fresco is manufacturing **foot care products** since 1975

- ✓ 4.000 m2 of facilities
 - ✓ 3.000 Spanish medical professionals purchasing products directly
 - ✓ Sales to more than 60 countries covering all continents
- ✓ **PRODUCTS MANUFACTURED IN SPAIN:** European service and quality

RESEARCH & DEVELOPMENT

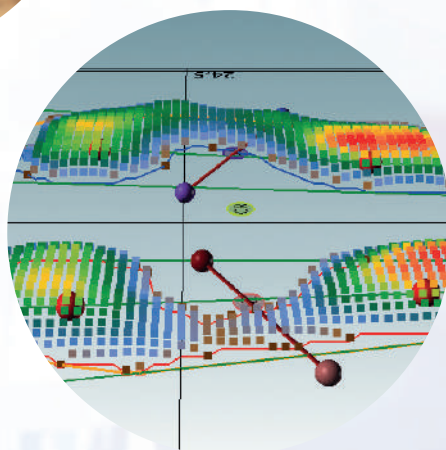

Since 1975 Fresco is working closely with specialists to develop and manufacture useful products that cover daily needs of professional practitioners and patients.

ONGOING IMPROVEMENT

We invest every year on equipment and human resources, experiencing with new raw materials, designing new products and improving current ones.

To reach superior products performance at reasonable prices our team works closely with our costumers strengthening our links.

QUALITY

Our quality management system, audited according to ISO 13485 and ISO 9001 norms, supports research and development tasks as well as all the other processes of the company.

TEST LAB

With the aim of giving best response to market requirements we provide tests results with our testing equipment, including among others compression, elongation tests and pressure mapping analysis.

QUALITY & CERTIFICATIONS

FRESCO holds the Medical Manufacturer Licence 5649-PS as a manufacturer audited by the Spanish Agency for Medical Devices and Pharmaceuticals. Additionally Fresco complies with latest Quality Management standards. Including **ISO 9001:2015** as well as the specific norms for Medical Devices in **ISO 13485:2016**.

Fresco is often audited by its OEM customers, including large retailers known worldwide. In the last 12 months has passed:

- Quality audits from customers: **4**
- Social audits from customers: **2**
- Upgrade to latest ISO'S: **9001:2015 and 13485:2016**

All Fresco's manufactured medical products have CE marking.
The company is FDA registered.

SOURCING AND SPECIAL REQUIREMENTS

If you can't find a suitable stock product in this catalogue, please contact us. We are manufacturers, and we may be able to help you. **Special orders may be subject to large quantities.**

Fresco has long track record manufacturing on private label basis for top retail distributors in Europe and abroad.

Our team and facilities are ready to accompany our customers from the early stages, beginning in product and marketing definition and ending on the delivery of ready to market products.

Our flexibility to adapt to the needs of each case give options to our customers to choose among different product presentations, such as different packaging types.

All processes included in private label projects are executed under the standards of **Fresco's quality management system**.

OUR TECHNOLOGIES

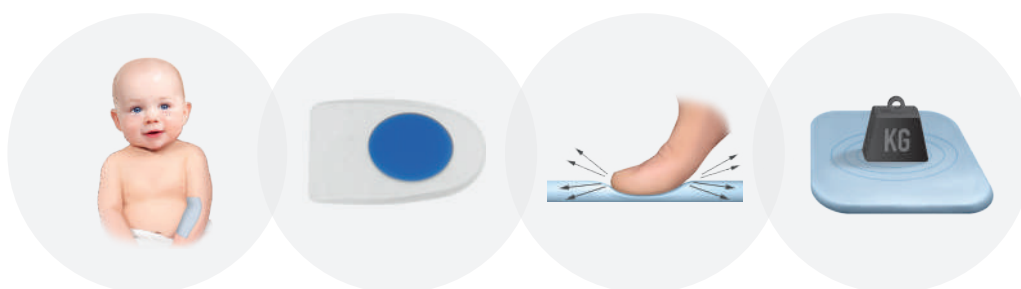

Fresco capabilities include two main technologies. Polymer gel technology and Silicone technology.

Other cushioning technologies such as foams, felts or textile devices are also processed in Fresco's facilities and are used in the production of orthopedic felts, foam pads and moleskin sheets among others. **All Fresco technologies use biocompatible raw materials to ensure its suitability to be used as a Class I medical device.**

Silicone

The great support and resilience of silicone devices makes them suitable to support body weight in applications such as insoles, heel cups and heel pads.

Fresco uses biocompatible certified silicone to assure its suitability to be used in Class I medical devices.

Biocompatible

Two densities

Strongly resists
bottoming out

Shock absorber

Silicone is made in different densities to increase comfort on pressure areas, softer density silicone is typically applied in the ball of the foot and heel area.

**100% medical
silicone**

**Relieves pain &
gives comfort**

**Cushions
& protects**

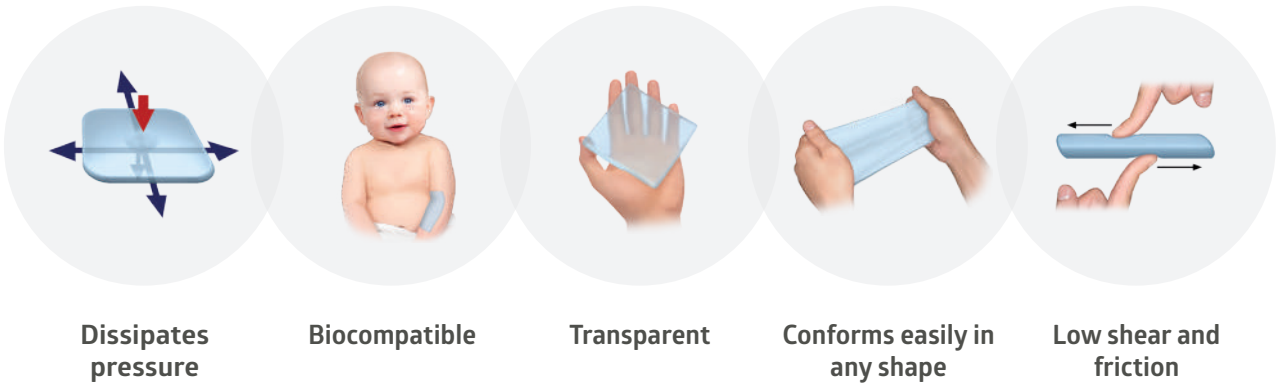

**Washable
& reusable**

Polymer gel

Polymer gel devices have superior pressure dispersion capacity to compression and shear forces. Their softness and elasticity make them suitable to give comfort and protection. Additionally their medical grade oil based composition provides moisturizing effects to the skin.

To further ensure the company's commitment to quality and safety the following biocompatibility and cytotoxicity assays have been passed by our gel formulation.

• BIOCOMPATIBILITY AND ISO 10993 MEDICAL DEVICE TEST •

Our gel polymer has passed the following tests to certify it complies with the CE regulations for biological evaluation of medical devices according to ISO 10993.

- Skin irritation test: **ISO 10993-10**
- Analysis of intracutaneous reactivity: **ISO 10993-10**
- Skin sensitisation study: **Buehler test in compliance with UNE-EN ISO 10993-109**
- Cytotoxicity assay: **ISO 10993-5**

**Hydrates
the skin**

**Washable
& reusable**

**Relieves pain &
gives comfort**

**Cut
to size**

**Cushions
& protects**

- Cardboard: 70 x 100 mm x 4 sheets

AVAILABLE PACKS:

BUNION

MET & BUNION PROTECTOR SLEEVE

Protector sleeve made of an elastic and soft hypoallergenic fabric that incorporates gel pads in the metatarsal and bunion areas. Provides relief from discomfort in the ball of the foot area whilst massaging the fleshy parts of the bunion. The product's design ensures that the gel always stays in the correct position. Fits in all types of footwear.

F-00042-46 S
F-00042-47 L

AVAILABLE PACKS:

PROTECTIVE BUNION SLEEVE

Very elastic protective sleeve. The inner gel pad provides immediate relief and protection in the bunion area. Its reduced size fits all types of footwear.

F-00042-06 One Size

AVAILABLE PACKS:

PURE GEL BIG BUNION PROTECTOR

100% gel bunion protector. Protects the bunion from chafing and relieves pressure and friction in that area. Made of moisturizing, elastic and soft gel.

F-00042-05 One Size

AVAILABLE PACKS:

OTC PRODUCTS | **BUNION****GEL TOE SPREADER & BUNION PROTECTOR**

Bunion protector with built-in spacer. Relieves and dampens pressure and friction in the bunion area, while helping correct positioning of the big toe. Made of an elastic and soft, moisturizing gel, it aids the disappearance of corns and abrasions. One size fits all.

F-00042-54 One Size

AVAILABLE PACKS:

**5TH TOE GEL BUNION PAD**

A gel protector for Tailor's Bunion (5th toe). Its small size and special design allows its use in any shoe. Gives immediate relief by constantly massaging the area and joint. Made of an elastic and soft, moisturizing gel, it aids the disappearance of corns and abrasions.

F-00042-59 One Size

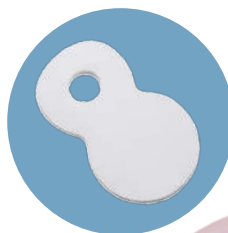

AVAILABLE PACKS:

**SMALL BUNION GEL PROTECTOR**

Very elastic fabric bunion protector covered on the inside with 2 mm of gel. Its small size and special design allows it to fit perfectly into a shoe, helping to give immediate relief by constantly massaging the fleshy parts of the foot and joints. Made of moisturizing, elastic and soft gel.

F-00042-07 One Size

AVAILABLE PACKS:

GEL BUNION PROTECTOR

A bunion protector made of gel. Its small size and special design allow its use in any shoe. Gives immediate relief by constantly massaging the area and joint. Made of an elastic and soft, moisturizing gel, it aids the disappearance of corns and abrasions.

F-00042-09 One Size

AVAILABLE PACKS:

ANATOMICAL BUNION PROTECTOR

Made of moisturizing, elastic soft gel. It gives immediate relief by constantly massaging the area and joint. Its anatomical shape adapts to the area of the foot providing comfort in any type of shoe while protecting against corns and abrasions. Its toe loop helps holding the product in place, sliding over the big toe.

F-00042-19 One Size

AVAILABLE PACKS:

HALLUX VALGUS NIGHT SPLINT

Plastic sling holds the foot in the correct position during the night. Soothes pain by pulling the joint outwards. Realigns the big toe and prevents possible worsening. Traction must be carried out so that correction of the toe deformity is visible. Placement is most effective when the articulation at the base of the big toe experiences a slight pain when pushed. The night splint follows the principle of preventive bindings (prolonged, low-intensity action) through which progressive improvement is achieved until the soft parts and articulations are normalized without damage. The articulation should not be forced in such a way that pain prevents one from resting properly. The curve of the splint matches the curve of the instep of the foot (as with footwear).

F-00020-01 S

SILICONE INSOLE

Manufactured with two different types of silicones; soft and firm. The blue coloured area is extra soft giving greater cushioning to the heel and metatarsals. Indicated for the reduction of pain in metatarsals, heels, hips and knees. It will also assist in the prevention of callusing. Produced in an anatomical shape without metatarsal elevation.

Exclusive design specially produced for Podiatry

Design patented by Fresco Nº 17982208

MIXABLE SILICONES

Fresco's silicones have been used since 1985 by podiatrists all over the world. Our silicones are easy to use. With them you will achieve the palliative, corrective or substitutive orthosis you need.

Fresco's training department presents an educational VIDEO on Fresco's silicones. The demonstrations are presented by **Mr. Alberto Fresco**, who has over 40 years of experience working with silicones and has run educational courses for podiatrists throughout the world.

YouTube

Also available at:
<http://www.youtube.com/user/FrescoExport>

SILICONE COURSES

In Fresco we say that mixable silicones allow the professional to do a customized solution for the patient with a specific approach to his or her needs.

Unfortunately mixable silicone technique is something that many times is not taught properly in schools and the professional may feel unsecure when using them. For this reason in Fresco we help our customers learn the different ways of using silicone and its different types, as well as the techniques available to the foot care specialist. We offer two different types of trainings:

In your country: These courses are usually focused to professionals, ideally in groups of 15-20 people, with 2 or 3 different groups in 2-3 days (one day per group). With a duration of 4-5 hours, it is enough to give a good overview of the main techniques on the use of silicone. It can also be adapted to sales teams or students with their teachers at university or school.

In Barcelona: you can also send people from your staff to our offices in Barcelona. They can be trained here to be able to do courses themselves to other professionals in your country.

Silicone Characteristics

- ✓ **Easy to use**, it is soft, elastic and smooth to touch. It hydrates the skin, helping to regenerate it and soften the harder parts.
- ✓ **Very comfortable**, it eases pain immediately. It is recommended to moisten the fingers with water if it sticks to them when manipulating.
- ✓ **It hardens with liquid catalyser or in paste**. It can be mixed with other poly-condensation silicones from Fresco in order to achieve different levels of hardness.
- ✓ **Its high level of elasticity and low stiffness** makes it appropriate for work in geriatrics and in diabetic feet. The finished orthosis is both washable and reusable.

SILICONES

MIXABLE SILICONES

SOFT SILICONES

SILICONE BLAND-ROSÉ

F-01930-01 500g

F-01930-21 200g

The Bland-Rosé poly-condensation silicone continues to be one of the softest silicones on the market. Especially designed for its use in podiatry it is recommended in the making of palliative orthosis.

TECHNICAL CHARACTERISTICS:

- ▶ Density (g/cm³): 1.06
- ▶ Modulus 100% (MPa): 0.19
- ▶ Breaking resistance MPa: 0.8
- ▶ Stretching: 364%
- ▶ Split resistance (KN/m): 4.4
- ▶ Hardness Shore A: 2-4

SILICONE BLAND-NATURE

F-01933-00 500g

Skin-coloured soft putty silicone. Recommended in the making of palliative orthosis.

TECHNICAL CHARACTERISTICS:

- ▶ Density (g/cm³): 1.07
- ▶ Modulus 100% (MPa): 0.18
- ▶ Breaking resistance MPa: 0.8
- ▶ Stretching: 442%
- ▶ Split resistance (KN/m): 4.2
- ▶ Hardness Shore A: 2-6

SILICONES

MEDIUM SILICONES

SILICONE FRESCO

F-01923-00 500g

F-01923-20 200g

Poly-condensation medium hardness silicone specially designed for its use in Podiatry. It is indicated to make both palliative and corrective orthosis. Easy to use its medical oils hydrate the skin, softening and helping regenerate the hyperkeratotic areas. It hardens with either liquid or paste catalyst. To achieve different hardnesses it can be mixed with other poly-condensation silicones of the Fresco range. Moisten your fingers with water if the silicone paste adheres to the fingers when handling.

TECHNICAL CHARACTERISTICS:

- Density (g/cm³): 1.09
- Modulus 100% (MPa): 0.56
- Breaking resistance MPa: 1.4
- Stretching: 245%
- Split resistance (KN/m): 5.2
- Hardness Shore A: 14-16

Shore A 14-16

HARD SILICONES

SILICONE ORTHESIL

F-01922-01 500g

Poly-condensation hard silicone specially designed for its use in Podiatry. It is indicated to make corrective rigid orthosis. Very easy to use, it hardens with either liquid or paste catalyst. To achieve different hardnesses it can be mixed with other poly-condensation silicones of the Fresco range. The finished orthosis is washable and reusable.

TECHNICAL CHARACTERISTICS:

- Density (g/cm³): 1.40
- Modulus 100% (MPa): -
- Breaking resistance MPa: 1.8
- Stretching: 175%
- Split resistance (KN/m): 12
- Hardness Shore A: 32-35

Shore A 30-32

SILICONE 1400

F-01921-01 500g

F-01921-20 200g

Poly-condensation hard silicone specially designed for its use in Podiatry. It is indicated to make corrective rigid orthosis with a higher elasticity than other compounds. Its elasticity allows it to be better worn inside the shoe and lasts for longer. It hardens with either liquid or paste catalyst. To achieve different hardnesses it can be mixed with other poly-condensation silicones of the Fresco range. Moisten your fingers with water if the silicone paste adheres to the fingers when handling. The finished orthosis is washable and reusable.

TECHNICAL CHARACTERISTICS:

- Density (g/cm³): 1.2
- Modulus 100% (MPa): -
- Breaking resistance MPa: 2.2
- Stretching: 500%
- Split resistance (KN/m): 11
- Hardness Shore A: 28-32

Shore A 28-32

SILICONES

DUO SILICONES

DUO 10

F-01924-00 (250g + 250g)

Duo is a bi-compound 1+1 mixable soft silicone. Specially designed for the making of simple palliative or corrective orthosis. Very easy to use: to make an orthosis just mix the same quantity of both components (A+B) until reaching an even colour. Then mould onto the foot. The result is a soft and comfortable orthosis. The finished orthosis is both washable and reusable.

TECHNICAL CHARACTERISTICS:

- Density (g/cm³): 1.25
- Modulus 100% (MPa): -
- Breaking resistance MPa: 1.2
- Stretching: 550%
- Split resistance (KN/m): 5
- Hardness Shore A: 10-12

Shore A 10-12

DUO 30

F-01928-00 (250g + 250g)

Duo is a bi-compound 1+1 mixable soft silicone. Specially designed for the making of simple corrective or substitutive orthosis. just mix the same quantity of both components (A+B) until reaching an even colour. Then mould onto the foot. The result is a rigid device. The finished orthosis is both washable and reusable.

TECHNICAL CHARACTERISTICS:

- Density (g/cm³): 1.26
- Modulus 100% (MPa): -
- Breaking resistance MPa: 2.4
- Stretching: 270%
- Split resistance (KN/m): 7.3
- Hardness Shore A: 30-32

Shore A 30-32

SILICONES

LIQUID SILICONES

POLYMER OF SILICONE

F-01906-01 250g

Liquid silicone semi-rigid with medium elasticity. A Bi-compound elastomer that vulcanises with any of the Fresco catalysts. Can be used to repair silicone orthotics, or as a joining material with other silicones. Designed to cover Tubiton, gauze and latex foam rubber. Of liquid form and a transparent colour of low viscosity. Once vulcanised it becomes a rigid and semi transparent silicone.

TECHNICAL CHARACTERISTICS:

- ▶ Density (g/cm³) at 20°C: 1
- ▶ Viscosity at 20°C: 20.000 Cst
- ▶ Traction resistance (Kg/cm²): 11
- ▶ Stretching: 250%
- ▶ Split resistance (Kg/cm): 4
- ▶ Aspect: Liquid
- ▶ Hardness Shore A: 20

SILICONE RTV-11504

F-01907-01 300g

Liquid silicone very elastic, flexible and with a high adherence. A Bi-compound elastomer that vulcanise with any of the Fresco catalysts. The 11504 is normally used to repair silicone orthotics, or as a joining material with other silicones. It is elastic, flexible and has excellent tensile and a high rupture strength. This product should be mixed with a spatula due to its fluid like nature. Can be mixed with other silicones in the range to provide greater elasticity and softness.

TECHNICAL CHARACTERISTICS:

- ▶ Density (g/cm³) at 20°C: 1.3
- ▶ Viscosity at 20°C: 46.000 Cst
- ▶ Traction resistance (Kg/cm²): 32
- ▶ Stretching: 320%
- ▶ Split resistance (Kg/cm): 17
- ▶ Aspect: Liquid
- ▶ Hardness Shore A: 10

STARTING KITS

DUO 10 STARTING KIT

F-01924-02 (100g + 100g)

The starting Kit is for professionals who wants to learn how to use silicones and try the most popular of the DUO range. This kit will provide the user with enough material to practice with the silicone.

STARTING KIT BOX

The starter kit is for professionals who want to learn how to use silicones and to try the most popular of the Fresco silicone range. The kit includes two different types of silicone, a soft and a medium hardness, together with a liquid catalyst. A DVD is also available containing a training video demonstrating in clear easy steps how to work with the material and how to produce silicone orthotics.

F-01926-00 1 kit**F-01926-01 1 kit + DVD**

KIT CONTENT:

- ▶ 100 g of silicone Bland-Rosé (Soft Shore A 2-4)
- ▶ 100 g of silicone Fresco (Medium Shore A 14-16)
- ▶ 20 ml. liquid catalyst Reaktol

SILICONES

SILICONE MATERIAL

SORBOPRESS

Sorbopress is a Bland-Rosé silicone sheet with adhesive in one side. Can be used as a protector for any part of the foot. Its low hardness: Shore A 1 allow the product be used for special applications where a really soft protector is needed. Supplied in two different thickness 2 and 3 mm.

- F-01940-01** 2 mm thickness 300 x 275 mm sheet
F-01940-02 3 mm thickness 300 x 275 mm sheet

REAKTOL

F-01908-00

A Liquid catalyst used for the mixing of all types of the Fresco silicone range. Has a shelf life of 3 years.

TECHNICAL CHARACTERISTICS:

- *Colour: Transparent*
- *Chemical characteristics: Alkyl stannosiloxane (preparation). Free of organic tin compounds. Tetraetil-silicate / Tetrakis (2-n-butoxietoxisilane)*

PASTE CATALYST RED

F-01910-00

Paste catalyst used for the mixing of all types of the Fresco silicone range. Its red colour gives a soft red colour to the final orthosis. It is a little bit slower and gives a softer result orthosis than the liquid catalyst. Has a shelf life of 2 years.

SILICONE OIL

F-01910-00

200 ml silicone oil which can be used to obtain a brighter, more consistent and softer to the touch finishing work to any orthosis made with our silicones. It can also be mixed with other paste and liquid silicones to make the mass more fluid. If you need to make an orthosis with any kind of support (fabric or any other porous material) if the oil is used in the mass this will help the silicone penetrate and stick much better on the support. It is recommended to test the support beforehand, silicones do not adhere easily to plastic or other nonporous materials.

ORTHOSIS MATERIAL

SPATULA INOX

Spatula inox for liquid silicone's works.

F-01903-00	Circular shape	Blade length: 10 cm	Total length: 20 cm
F-01903-01	Triangular shape	Blade length: 15.5 cm	Total length: 26.5 cm

SCALE

F-01945-00

Scale for accurate measurement of silicone when producing orthoses. Using scales offers the following advantages:

- ▶ Saving in silicone
- ▶ Reduction of errors

RIGID PLAQUE

F-01904-00

Rigid plaque used for liquid silicones' works.

- ▶ Size: 20 x 25 cm

SILIMAX® + BRUSH N°6

F-01909-00 30 ml

It can be used to mend cracks, folds, additions, finishings for silicone orthosis appliances. Holds in 30 minutes.

PADDING

MOLESKINS

VELVET MOLESKIN

F-00508 30 x 20 cm 15 sheets per box

Semi-elastic velvet tissue 100% cotton. Hypoallergenic rubber adhesive with a support of cotton gauze tissue.

- ▶ Thickness: 1.9 mm
- ▶ Soft pink color
- ▶ Cut to size sheets

AVAILABLE PACKS:
